PROFESSIONAL SUMMARY

Recent Electronics and Communication Engineering graduate with hands-on experience in Core Java, Python, Oracle SQL, and Web Development (HTML, CSS, JavaScript). Demonstrated expertise in data engineering, AI/ML data operations, and RLHF workflows through internships at Prodapt and SkyPoint AI. Skilled in building responsive web applications, SQL optimization, and Azure Databricks pipelines. Strong analytical thinker with a track record of delivering user-focused software solutions in fast-paced environments.

EXPERIENCE

AI and Data Intern | [Prodapt](#)

2026 – Present

- Contributed to **Datastreak 2.0** — performed SQL query optimization, query versioning, data quality checks (QC), and product catalogue mapping to improve data accuracy and pipeline efficiency.
- Supported **Datastreak 3.0** by implementing a BigQuery ↔ Apache Doris migration workflow (without Airbyte) and building a generic product catalogue mapping solution.
- Contributed to a full UI redesign of Datastreak 3.0 and added new connectors including Google Cloud Storage (GCS) and Snowflake to expand data integration capabilities.
- Built an **Agent Builder** that converts natural language user requirements into executable Langflow pipelines using a multi-agent workflow; implemented token guardrails to improve LLM-driven workflow safety and reliability.
- Worked on **AskBI** — an AI-powered BI platform using an agentic pipeline for natural language parsing, metadata extraction, SQL generation, ranking, validation, and explanation generation.
- Currently building features for a Migration Intelligence Platform, integrating MCP servers, and supporting frontend redesign for AI/data products.

AI Data Curation and RLHF Intern | [SkyPoint AI](#)

2025

- Curated and validated **healthcare datasets** for AI model training — performed quality checks, data validation, and labeling on structured and semi-structured data.
- Developed **DBT models** for healthcare benefits data covering staging, cleaning, transformation, and documentation to support BI and AI pipelines.
- Wrote and optimized SQL queries in Azure Databricks for data profiling, cleaning, joining, and validation across large healthcare datasets.
- Supported RLHF workflows by refining datasets for LLM training and evaluation, improving label quality, metadata consistency, and annotation accuracy.
- Automated QC and validation tasks using Python, reducing manual effort and improving workflow efficiency.

Frontend Developer Intern | [PygenicArc](#)

2023

- Developed a frontend educational website using HTML, CSS, JavaScript, and Bootstrap, offering 10+ categorized study materials and interactive quizzes to improve engagement for school students.
- Integrated interactive features including downloadable PDFs and topic-based assessments.

Project Management Intern | [RitikaYourHealthCoach](#)

2023

- Assisted in website QC, bug reporting, and UI/UX issue tracking.
- Supported project timeline management, team coordination, and social media content planning.

PROJECTS

Student Database Management System — *Major Project*

A web-based system for efficient student record management with secure database integration. Features include role-based access control, a clean UI, and cloud storage integration for data security.

Tech Stack: Python, Flask, SQLAlchemy, HTML, CSS, JavaScript

AI-Powered Symptom Checker — *Hackathon Project*

An AI chatbot providing preliminary diagnosis suggestions based on user symptoms. Utilized ML models trained on healthcare datasets to analyze symptoms and deliver relevant health insights.

Tech Stack: Python, NLP, Flask, Google Gemini, CORS, HTML, CSS

German Bot — Your German Teacher — *Hobby Project*

An AI chatbot that teaches German through conversation — translation, corrections, vocabulary practice, and pronunciation guidance. Integrated NLP-based text processing and LLM responses for personalized learning. Deployed on Replit for public access.

Tech Stack: Python, NLP, Flask, Google Gemini API, HTML, CSS, JavaScript

Personal Portfolio Website — *Live Project*

A fully responsive portfolio website showcasing projects, skills, and professional journey. Hosted live via GitHub Pages.

[View Live →](#)

Tech Stack: HTML, CSS, JavaScript

HACKATHONS

- **8-Hour Hardware Hackathon @ KSIT College:** Built an Arduino Obstacle Avoiding Car that follows a black line and categorizes patients into critical, stable, and monitoring-required states, providing doctors with real-time counts.
- **24-Hour Software Hackathon:** Developed an AI-Powered Symptom Checker app offering preliminary diagnostic suggestions based on user-reported symptoms.

EDUCATION

B.E. in Electronics and Communication Engineering K.S. School of Engineering and Management, Bangalore	2021 – 2025 CGPA: 8.71
Pre-University Course – Science (PCMB) SSMRV PU College, Bangalore	2019 – 2021 93.5%
ICSE Class X Aradhana Academy, Bangalore	2018 – 2019 87%

TECHNICAL SKILLS

Programming Languages: Python, Core Java, C

Web Development: HTML, CSS, JavaScript, Bootstrap

Database & Data Engineering: Oracle SQL, Azure Databricks, DBT (Data Build Tool), BigQuery, Apache Doris, SQL Query Optimization, Data Preprocessing, Data Validation & QC, RLHF Dataset Workflows

Tools & Technologies: Python Automation, Git & GitHub, Excel (Advanced), Langflow, MCP Servers, Snowflake, Google Cloud Storage (GCS), GenAI, Copilot for VS Code

Areas of Interest: Data Analytics, Software Development, Web Development, Project Management, AI/LLM Data Operations

Soft Skills: Adaptability, Attention to Detail, Problem Solving, Communication & Presentation, Collaboration, Time Management

Volunteering & Leadership: NSS Co-Ordinator, Rotaract Member, College Cultural Fest Co-Ordinator
